Grade 7 Math course outline

Grade 7 math continues to build students' mathematical foundations while introducing new concepts that will help students prepare for more advanced math classes.

Topics include factors and multiples, ratios and rates, coordinates and linear graphs, perimeters and areas, and an introduction to algebra.

The course is designed to broaden students' horizons and help them begin to see how the math learned in class can be applied to real-life problems.

Students will be graded as follows:

6P 10%
Quiz 20%
Daily Work 25%
Project 25%
Test 20%

Dimensions Math, Common Core, 7A and 7B will be the course`s textbooks.

Students will be provided with laptops and notebooks.

Students will be assessed on a weekly basis.
