Yearbook/ICT Course
2020-2021

"Humans, not places, make memories." - Ama Ata Aidoo

The Yearbook/ICT course allows students the opportunity to compile memories from the year, interact with all students of the school, use technology in a meaningful way, and share a finished product that will be appreciated by everyone.

This year, the course will not only focus on learning ICT and creativity skills, but also focus on learning photography skills that will be used to produce great content for the yearbook. The program that will be used to create the Yearbook will be Google Slides, which will challenge students to combine text and photos to create pages. Students will also learn collaboration skills as the Yearbook will be a year-long group project.

Every student will work on their own laptops and are required to have access to Google Slides. Students will be given permission by the teacher to use personal devices to take pictures for the yearbook. Before taking any pictures with a personal device for an event for the yearbook, the student must first ask and confirm that they have permission from the teacher to do so.

EARNING YOUR GRADE
Your grade will be determined by your work in these categories:

6P's = 100%
